

PILLAR TWO - Are you ready?

Pillar Two is no longer a future compliance project – for many multinational groups, the first reporting and filing obligations are now rapidly approaching.

While filing deadlines vary between jurisdictions, many groups will face their first Pillar Two compliance obligations from **30 June 2026 onwards**, with some jurisdictions providing later filing deadlines.

We are pleased to share our Pillar Two presentation where we gave insight from a global perspective and highlighted key differences across our selected regions and countries. The recording is available [here](#).

HOW CAN MOORE HELP?

Wherever you are on your Pillar Two journey, the Moore team can help you with everything from implementation through to advisory services including calculation and data collection, compliance, review, audit and advise on your obligations.

The requirements upon an organisation will vary greatly upon the jurisdictions you operate in, the sophistication of existing tax governance policies and compliance processes.

Identifying the significant burden on existing resources, Moore has partnered with Wolters Kluwer for a global license to their newly developed Pillar Two module as part of their **CCH Integrator corporate tax platform**.

As well as full scope of services to meet your Pillar Two needs, we are also equipped to offer alternative solutions, including implementation on an in-house basis.

WOLTERS KLUWER PARTNERSHIP:

- All-in-one solution as a single source of truth
- Simplifies end-to-end BEPS Pillar Two compliance
